Professional Summary

- Aspiring **Cyber Security Enthusiast** with strong foundational knowledge backed by **CompTIA Security+**, **ISC2 CC**.
- Transitioning from 5+ years in digital marketing and ad operations, bringing proven strengths in **data analysis, pattern recognition, and process optimization**.
- Skilled in working with large datasets, interpreting performance metrics, and delivering **clear, actionable insights** for fast decision-making.
- Strong communication and stakeholder management skills from previous client-facing roles, enabling efficient coordination with IT, security, and engineering teams for **remediation efforts**.
- Highly motivated and quick learner with a deep interest in cyber security posture, risk prioritization, and continuous improvement of security posture.
- Demonstrates a proactive approach to problem-solving and a commitment to **growing within Cybersecurity operations**.

Transferable Skills

- Data Analysis & Pattern Identification
- Problem Solving & Root Cause Analysis
- Stakeholder & Client Communication
- Project Coordination & Operational Efficiency
- Process Documentation & Workflow Optimization

Certifications

Certification	Status / Completion Date	Links
CompTIA Security+	Completed – October 27, 2025	https://www.credly.com/badges/496e7390-a838-4052-89d2-f57b028fdc3e/public_url
ISC2 CC (Certified in Cybersecurity)	Completed – September 22, 2025	https://www.credly.com/badges/d7a3a157-dd5b-47ee-9546-20934472f211/public_url
Qualys VM DR Module	Completed – November 5, 2025	

Technical skills

Tools	Knowledge level	Homelab links	Topics covered
Qualys VMDR	Intermediate	Qualys VMDR Homelab	Asset discovery and tagging, Scanning and discovery, prioritization and remediation, validation
Tenable Nessus	Intermediate	Nessus Homelab git	Scanning and discovery, prioritization and remediation, validation
Nmap	Intermediate	Nmap Homelab	Host discovery, Port scanning, Network vulnerability
Wireshark	Intermediate	Wireshark Homelab	Analyzing network traffic, communication behaviour, Packet filtering
Metasploit	Basic	Metasploit homelab	Exploit validation

Qualys VMDR

Performed asset discovery and tagging using Qualys VMDR to simulate enterprise vulnerability inventory management.

Conducted network vulnerability scans and analyzed findings using CVSS-based prioritization to identify critical risks.

Developed remediation recommendations and validated high-severity vulnerabilities through manual verification in a controlled lab environment.

Tenable Nessus

Executed vulnerability scans using Nessus Essentials against Metasploitable targets to identify exposed services and outdated software.

Interpreted CVSS scores and vulnerability reports to prioritize remediation of critical and high-severity findings.

Practiced manual validation of scanner findings and documented remediation strategies aligned with vulnerability management workflows.

Nmap

Performed host discovery and network reconnaissance using Nmap to identify active systems within a lab subnet.

Conducted port scanning and service enumeration to detect exposed services and analyze potential attack surface.

Utilized Nmap scripting and version detection to identify vulnerable services and support vulnerability assessment activities.

Wireshark

Captured and analyzed network traffic using Wireshark to study protocol behavior and communication patterns.

Applied packet filtering techniques to identify HTTP, FTP, and TCP traffic during network analysis exercises.

Investigated plaintext credential exposure and insecure protocols to understand network security risks.

Metasploit

Used Metasploit Framework to perform controlled exploit validation of critical vulnerabilities identified during scanning.

Practiced executing public exploit modules against vulnerable services such as FTP and Samba in a lab environment.

Gained understanding of post-exploitation concepts and vulnerability impact assessment.

Professional Experience

Client: Vrinda Bizza

April 2023 - Present

Location: Kamareddy, India

Role: Co-founder & Operations Manager

Responsibilities:

- Co-founded and built a millet-based restaurant brand from the ground up, overseeing strategy, operations, menu development, and customer experience.
- Designed the complete operational framework including kitchen workflows, service processes, vendor relationships, staffing, and compliance systems.
- Developed and optimized a millet-focused menu featuring nutritious recipes using ragi, jowar, foxtail, and other indigenous millets, ensuring consistency and quality across all dishes.
- Established sourcing networks with local farmers and sustainable suppliers to procure high-quality millets and organic ingredients at competitive rates.
- Led end-to-end hiring, training, and performance management of service and kitchen teams, creating a skilled workforce aligned with the brand mission of healthy eating.
- Developed scalable workflows and operational structures that positioned the restaurant for future expansion and franchise possibilities.

Client: Blueline Digital

Sept 2021- April 2023

Location: Hyderabad, India

Role: Founder & Marketing Manager

Responsibilities:

- Founded and managed a freelance social media services brand, delivering end-to-end digital marketing solutions for diverse clients across multiple industries.
- Managed and optimized content across platforms such as Instagram, Facebook, YouTube, and LinkedIn, improving visibility and audience reach.
- Analysed performance metrics using platform insights and analytics tools to present data-driven recommendations to clients.
- Successfully handled multiple projects simultaneously, prioritizing deadlines and maintaining high output quality.

Client: Way2Online(Way2Target)

Sept 2018- Sept 2021

Location: Hyderabad, India

Role: Account Manager – Ad Operations (Email & SMS)

Responsibilities:

- Managed end-to-end Email and SMS marketing campaigns for **80+ brands monthly**, ensuring high deliverability, optimal targeting, and timely execution.
- Optimized campaign performance by improving segmentation, refining content strategies, and implementing A/B testing for subject lines, creatives, and timing.
- Monitored delivery KPIs (CTR, CTOR, bounce rates, spam/junk percentage) and provided clients with actionable insights to improve campaign effectiveness.
- Coordinated closely with creative teams, tech teams, and sales to ensure alignment on campaign goals, timelines, and deliverables.
- Maintained strong client relationships, offering strategic recommendations to maximize ROI and scale their digital reach.
- Ensured compliance with platform guidelines, anti-spam norms, and data protection requirements across all campaigns.
- Prepared performance reports and dashboards to present results, trends, and optimization strategies to clients and internal teams.

Education

PGDM – Marketing & Machine Learning

Vishwa Vishwani Institute of Systems and Management (2016–2018)

Bachelor of Technology – Computer Science & Engineering

Mallareddy College of Engineering & Technology
